SUMMARY

Computer Science Education student and full-stack developer building modern SaaS products, backend services and automation workflows. Focused on practical, scalable systems with clean interfaces, reliable APIs, databases and production-ready tooling.

TECHNICAL SKILLS EDUCATION

Frontend: Next.js, React,
TypeScript
Backend: FastAPI, Express,
Node.js
Data: PostgreSQL, Redis, SQL
Tools: Docker, Git, Prisma, n8n

UNIVERSITY OF ILORIN
B.Sc. (Ed.) Computer Science
Expected graduation: August 2027

LANGUAGES

Python
TypeScript / JavaScript
SQL
C / C++

SELECTED PROJECTS

AYEOLAB — AI STUDENT WORKSPACE

Full-stack AI workspace with study tools, projects, document-based workflows and a scalable product architecture.

BOOKEASE — SAAS WEB APPLICATION

Full-stack booking platform with authentication, database-backed workflows and SaaS-style UX.

DOCUMENT AUTOMATION SYSTEM

Automation workflow for processing uploaded documents, extracting structured information and generating useful outputs.

CORE STRENGTHS

Problem solving
API development
API & AI integrations
Database design
System thinking
Automation

DEVELOPMENT EXPERIENCE

INDEPENDENT SOFTWARE DEVELOPER

Project-based development • 2023 – Present

- Build responsive web applications and SaaS products from frontend to backend.
- Design REST APIs, authentication flows, PostgreSQL data models and Redis-backed services.
- Develop automation workflows using n8n and connect external services through APIs.
- Use Git, Docker and modern TypeScript/Python tooling to structure and ship projects.

FOCUS AREAS

SaaS applications
Backend systems
Developer tools
Workflow automation
